

macOS: Enterprise Connect

Last Modified on 12/13/2019 4:20 pm CST

Enterprise Connect assists UW-Eau Claire students and staff in updating their passwords on campus Macs, preventing keychain errors from happening. Once a user logs into Enterprise, it automatically maps the H, P, and W drives to the computer.

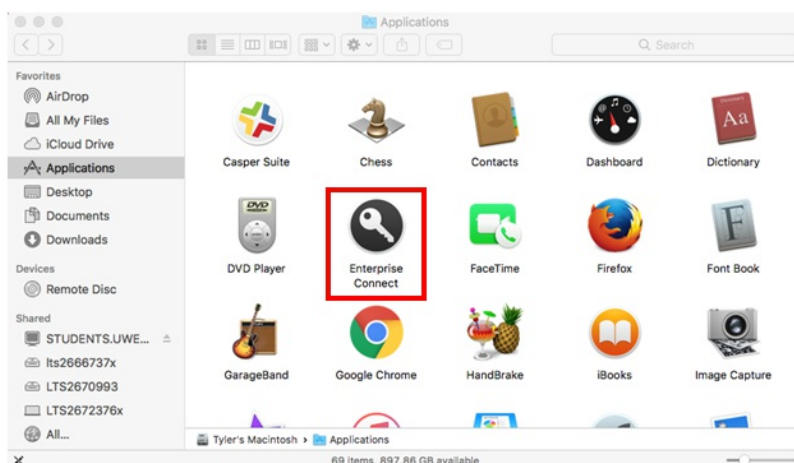

NOTE: This application only works for the University Macs and will not work on personal computers.

Using Enterprise

1. From the Desktop, navigate to the Go menu and select **Applications**.

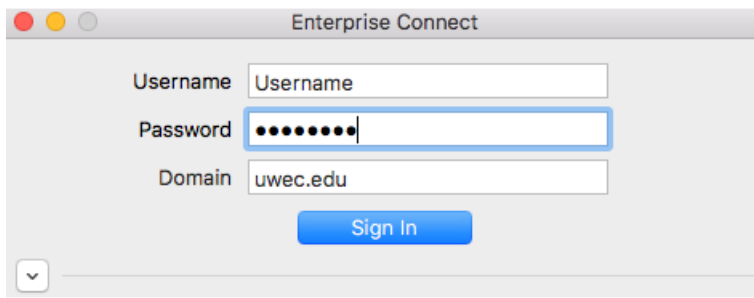

2. Click and open **Enterprise Connect**.

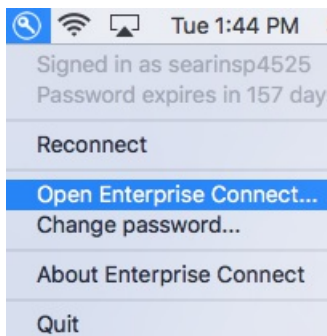

3. Log in using your University username and password.

NOTE: Once you log in, the window will automatically close.

To Map Additional Networks

1. In the menu bar, click the key icon.
2. Select **Open Enterprise Connect...**

3. Click the drop down arrow and click **Shares**.
4. Click the plus in the lower left corner to add a new entry field.
5. Type the address of the networks you want to add.
