Athena API Keys: Editing or Regenerating an API Key

To regenerate an API key:

1. Click Generate to regenerate a new key (a new, unique, randomized key should appear in the Key field).

2. Click Update API Key.

3. Update the regenerated API key in any connected apps.

To edit the name of an API key:

1. Update the Name of the API key.

   NOTE: The name should be descriptive of the intended use of the API key (i.e. the name of the app where it will be used or the person who will be using it).
2. Click **Update API Key**.
