

# Athena Keywords: Editing a Keyword

Last Modified on 03/08/2021 9:07 am CST

1. Edit the *Keyword* as desired.

*NOTE: The Slug is automatically generated and cannot be altered once the keyword has been created. If the keyword name needs to be changed considerably, it is recommended that a new keyword be created instead.*

The screenshot shows the 'New Keyword' form in the Athena system. At the top, there is a dark blue header with the University of Wisconsin logo and the text 'Keywords'. Below the header, the title 'New Keyword' is displayed. The form contains two input fields: 'Keyword' and 'Slug'. The 'Keyword' field is currently empty. Below the input fields, there are two buttons: a 'CANCEL' button with a left-pointing arrow and a 'SAVE' button.

2. Click **Save**.
