

# MacOS: Repairing a Keychain

Last Modified on 04/22/2022 10:45 am CDT

If you are being prompted by your Mac to supply a password for Keychain "login" follow these steps to either create a new login keychain or update to match your current University password. If you do not know your old password follow the steps to reset the keychain. If you know your old password, use that and follow the steps to update your existing keychain login.

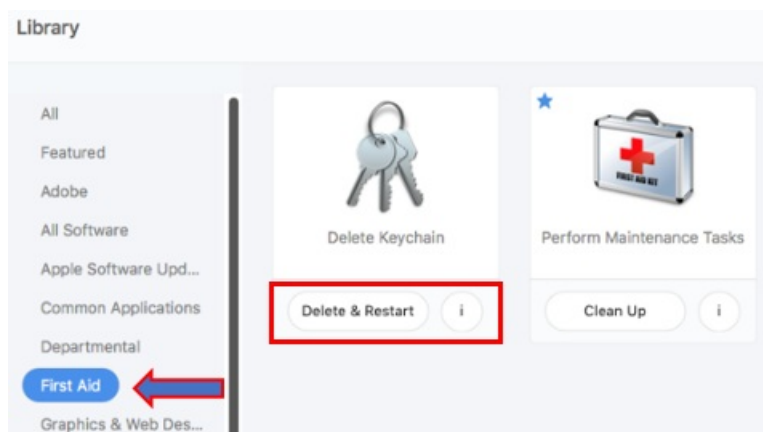

## Contents

## Reset Keychain

If you choose to reset your keychain, all saved passwords will be erased and your computer will immediately restart. Once you log back into the computer, the system may require passwords for Enterprise Connect, Outlook, and iCloud.

1. From the Desktop(finder), click **Go Menu**.
2. Select **Applications**.
3. Click **Self-service**.
4. In the left pane, click **First Aid**.
5. Click **Delete & Restart**.

6. A warning will pop-up stating that your computer will restart and erase all passwords. Click **Delete & Restart**.

7. Once the computer restarts, log back into your computer.

## Updating the Keychain Password

The steps below will allow you to use your old password to update your existing login keychain.

1. From the Desktop, click **Go Menu**.
2. Select **Utilities**.
3. Click **Keychain Access**.
4. Select **login** on left pane.

5. From *Edit*, select **Change Password for Keychain login**.
6. In the current password field type in your old UWEC password.
7. In the *new* and *verified fields* type in your new password.
8. Click **OK**.

9. Exit out of the window.
