

Kaltura: Enable Video Uploads to Kaltura Through the Canvas Student App

Last Modified on 04/20/2022 2:55 pm CDT

For students to upload a video from a smartphone or tablet to Kaltura through the Canvas Student app, the instructor needs to add “My Media” (Kaltura) to the course navigation. Please share the instructions on [how to complete a mobile upload](#) with students.

1. Login to Canvas and enter your course
2. Click **Settings** in the bottom of the navigation bar

3. Click **Navigation** in the upper tabs area

4. Click **My Media** in the list of items in the bottom area and drag it up to where you want it located above

NOTE: Media Gallery allows everyone in the class to share videos in one central repository. Many times, it is not ideal since there is no organizational structure and it would be better for instructors to set up discussions or assignments for student videos and for instructors to share videos in Pages, Announcements, etc.

Drag and drop items to reorder them in the course navigation.

Home	⋮
Syllabus	⋮
Announcements	⋮
Assignments	⋮
Grades	⋮
Collaborations	⋮
Office 365	⋮
Outcomes	⋮

Drag items here to hide them from students.

Disabling most pages will cause students who visit those pages to be redirected to the course home page.

Discussions <i>This page can't be disabled, only hidden</i>	⋮
People <i>This page can't be disabled, only hidden</i>	⋮
Pages <i>Page disabled, will redirect to course home page</i>	⋮
Files <i>Page disabled, will redirect to course home page</i>	⋮
