

Policies: First Aid Kit Program

Last Modified on 03/15/2022 9:40 am CDT

Departments are responsible for stocking first aid kits in their areas. Risk Management, Safety and Sustainability recommends first aid kits be located in the main office of each department and in high hazard areas such as laboratories and mechanical shops. Each kit shall be located in an area that is easily accessible and visibly marked as a place where first aid supplies are located. To ensure immediate access to first aid supplies, it is recommended that first aid kits not be locked.
