

Video Creation Tool Comparison Chart

Last Modified on 08/09/2022 12:45 pm CDT

Just as important as it is to determine the type of video you are creating, it is vitally important to understand the tools and programs available to help with the video-making process. Below is a chart you can use to determine which program to use when making a video. Each of these programs is supported by CETL/LTS, so if you have any questions on what to use and when to use it, please reach out to CETL@uwec.edu or place an LTS ticket at helpdesk@uwec.edu.

Tool	Recording Options	Operating System(s)	Export Formats	Cloud Compatibility	Length Of Video	Editing	Accessibility Features	Support
Kaltura Capture	Maximum of 3 Inputs from the following: Audio, Desktop Recording, Webcam Versatile recording options (such as multiple screens or cameras can be recorded) Single take recording with ability to pause	Desktop App: Mac and PC Mobile App	Link, MP4, Embed in Canvas	Stored in MyMedia and integrated within Canvas Mediaspace.wisconsin.edu	Unlimited, recommend between 1-20 minutes	Clip, Crop, Add Chapters	Automatically machine captioned Captions can be edited using an editor built into My Media	LTS Help Desk, Knowledge Base articles, UWSA Help De:
